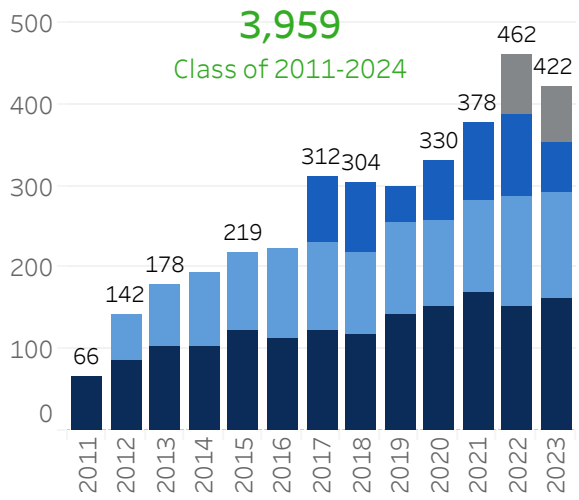
KIPP High School Alumni

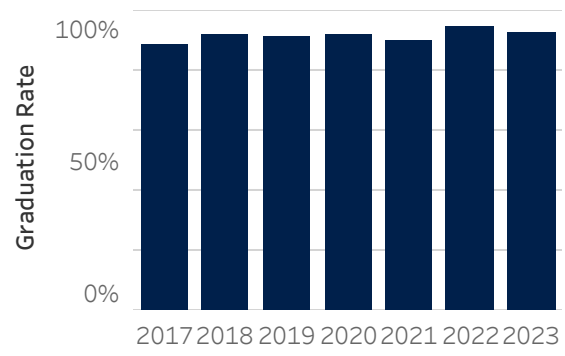
3,959
Class of 2011-2024



Dark Blue - King **Blue** - SFCP
Light Blue - SJC **Grey** - Navigate

KIPP High School Graduation

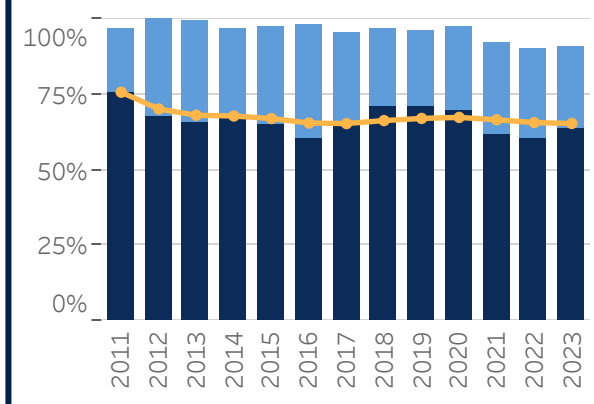
92%
Class of 2017-2023



Dark Blue - Class 4 Year High School Graduation

Post-Secondary Matriculation

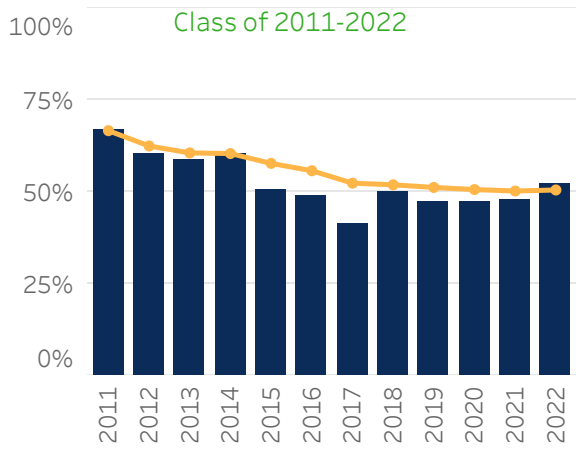
65% BA/BS | 30% AA/CTE/Military
Class of 2011-2023



Dark Blue - Class Matriculation to BA/BS
Light Blue - Class Matriculation to AA/CTE/Military
Orange - Cumulative Matriculation to BA/BS

College Persistence (BA/BS)

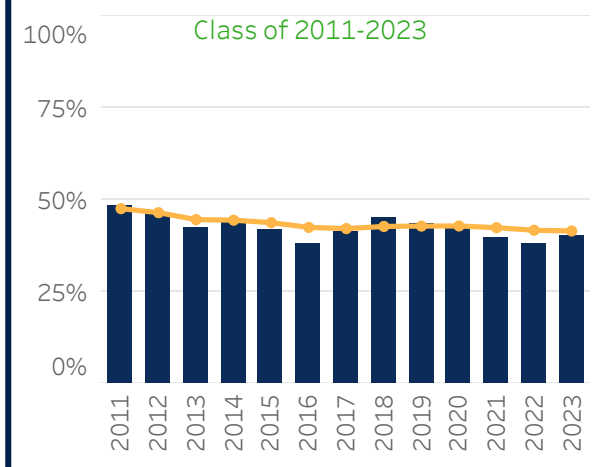
51%
Class of 2011-2022



Dark Blue - Class BA/BS Persistence
Orange - Cumulative BA/BS Persistence

Estimated College Completion (BA/BS)

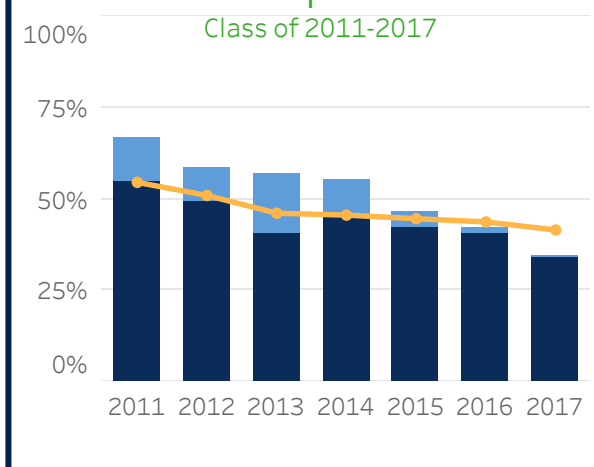
42% 6-Year
Class of 2011-2023



Dark Blue - Class Estimated College Completion
Orange - Cumulative Estimated College Completion

College Completion (BA/BS)

42% 6-Year | 48% All Time
Class of 2011-2017



Dark Blue - Class 6 Year College Completion
Light Blue - Class All Time College Completion
Orange - Cumulative 6 Year College Completion

Data Dictionary

KIPP High School Alumni - The number of KIPP high school students who have graduated with a high school diploma.

KIPP High School Graduation - The California 4-year cohort rate. This rate is calculated by dividing the number of high school students who have graduated high school within 4 years by the number of students who form the adjusted cohort for the graduating class. The 4-year cohort is based on the number of students who enter grade 9 for the first time adjusted by adding into the cohort any student who transfers in later during grade 9 or during the next three years and subtracting any student from the cohort who transfers out, emigrates, transfers to a prison or juvenile facility, or dies during that same period.

Post-Secondary Matriculation - KIPP high school graduates who have matriculated to a post-secondary education or training program. This calculation takes into account the characteristics of the first enrollment that a KIPP high school graduate pursues after high school graduation. The BA/BS matricualtion rate is calculated by dividing the number of KIPP high school graduates who matriculate to a BA or BS program by the number of KIPP high school graduates. The AA/CTE/Military matriculation rate is calculated by dividing the number of KIPP high school graduates who matriculate to an AA or CTE program or who enlist in the military by the number of KIPP high school gradates.

College Persistence (BA/BS) - KIPP high school graduates who are actively enrolled in a BA or BS program or who have completed a BA or BS program. This rate is calculated by dividing the number of KIPP high school graduates who either are currently attending a BA or BS program or who have graduated from a BA or BS program by the total number of KIPP high school graduates. This rate is not calculated for the most recent class of KIPP high school graduates.

Expected College Completion (BA/BS) - Projected college completion rate based on the Adjusted Minority Graduation Rate of the colleges that alumni matriculate to. KIPP high school graduates who do not matriculate to a 4-year college are included in this average with a 0% rate.

College Completion (BA/BS) - KIPP high school graduates who have completed a BA or BS program. This chart includes both the 6 year college completion rate, which refers to any KIPP high school graduates who have completed a BA or BS program within 6 years of high school graduation, as well as an all time college completion rate, which refers to any KIPP high school graduates who have completed a BA or BS program at any point. The denominator for both calculations is the total number of KIPP high school graduates. These rates are only calculated for classes that have had the opportunity to complete a BA or BS program within 6 years of high school graduation.

Alumni Success by Institution

This dashboard shows KIPP HS alumni persistence and completion by institution. This dashboard was primarily created to inform KIPP Forward team strategies around post secondary institution admissions advising and persistence supports.

Alumni persisting at an institution have an "Attending" or "Graduated" enrollment status. Persistence is not calculated for the most recently graduated HS class. Graduation rates for BA are only calculated for classes that graduated high school 6 years ago or earlier, and for AA they are only calculated for classes that graduated high school 3 years ago or earlier.

The unit for both charts is the institution, and only enrollments that were started (according to the ADB) are included in the calculations. For students with multiple enrollments at an institution, only the most recently started enrollment is considered in the calculations. Use the filters to adjust both the data parameters and the population displayed on both the scatter plot and in the institution drill down. Note that the x-axis for the scatter plot (Enrollments Started) is logarithmic.
